Art Unit: 3653

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3, 4, 6 through 10, 12, 14, 15 and 17 through 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Farquhar in view of Arneson et al '681 (both cited by applicant).

Farquhar teaches everything except the carton having a least one arcuate corner and an aperture at a juncture of the arcuate corner with a side wall of the carton.

Arneson et al teaches such a carton with at least one arcuate corner (see Fig. 1).

Accordingly, it would have been obvious to one of ordinary skill in the art to provide the carton of Farquhar with at least one arcuate corner with an aperture at the juncture of the corner with a side wall of the carton in view of the teachings of Arneson et al.

3. Claims 2, 5, 13 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 11 and 22 through 26 are allowed.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H Bollinger whose telephone number is 703-308-1113. The examiner can normally be reached on Monday through Friday from 9:00 am to 5:00 pm.
